

CAG ONE DIAMOND

QUICK-START SETUP GUIDE

A premium visual guide from unboxing to your first professional sharpening.

VISUAL | STEP-BY-STEP | FIRST SHARPENING

9 STEPS

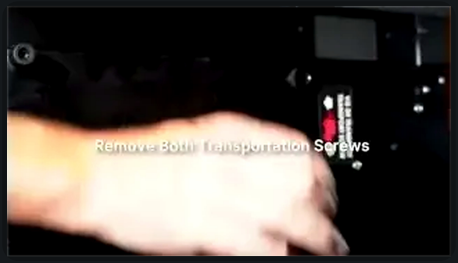

01 POSITION THE MACHINE

Before connecting power, carefully place the machine on its back on a clean, protected surface.

WORK SURFACE: Stable, clean and level.

02 REMOVE THE TRANSPORT SCREWS

Unscrew and completely remove both transportation screws from the underside of the machine.

Store both screws for future transport.

03 RETURN UPRIGHT & REMOVE THE SHIPPING RULER

Return the unit to its normal operating position. Press down on the clamp handle, then slide the plastic shipping ruler out of the skate holder.

The holder must be free before first use.

04 PREPARE THE SKATE HOLDER

Gently move the skate-holder carriage fully to the left. Pull the height adjuster fully up for hockey skates, or fully down for figure skates to clear the toe picks.

HOCKEY: Up | FIGURE: Down

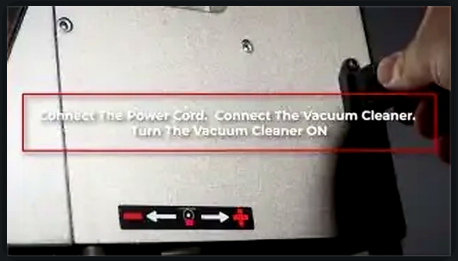

05 OPEN THE CLAMP

Use the handle on the left side of the holder to release the self-centering clamp.

The blade will center automatically when secured.

06 CONNECT POWER & VACUUM

Connect the machine power cord. Connect the vacuum cleaner to the dedicated vacuum outlet, then switch the vacuum cleaner on.

VACUUM: Keep it on during sharpening.

07 ACTIVATE & SELECT A CYCLE

Pull out the red emergency-stop switch. Select 5 cycles for standard sharpening, or 10 cycles for new or damaged blades.

5 = STANDARD | 10 = NEW OR DAMAGED

08 LOAD THE SKATE & START

Release the clamp, insert the skate blade and allow the holder to center it. Press Start; the machine completes the selected cycle automatically.

Keep hands clear while the cycle is running.

09 HONE & FINISH

Remove the skate. Hold a clean honing stone perfectly flat and hone both sides of the blade until the burr is completely removed.

Keep the stone flat to protect the finished edge.

SETUP COMPLETE

Your CAG ONE Diamond is ready for consistent, professional-level sharpening.
