Honing Stone / 250 Pairs

CAG ONE PRO Skate Sharpener

The Cag One Skate Sharpener Pro is a skate sharpening machine designed for hockey players, figure skaters, and other athletes who need to keep their skates sharp for optimal performance.

The self-centering blade holder is an innovative device that streamlines the blade alignment process by automatically aligning the blade with the grinding wheel upon insertion. By eliminating the need for manual adjustment, this technology saves time and reduces the risk of errors, resulting in a consistently sharp blade that enhances performance.

CAG ONE Skate Sharpener (Refurbished)

Our machines are fully rebuilt with brand-new mechanical and electronic parts, and upgraded with the latest features. Only the housing is reused, which is repainted to look like new.

The Cag One Skate Sharpener is a high-quality machine that is designed to last for years of use. It is easy to operate and can be used by both professionals and amateurs alike. This machine is a great investment for anyone who wants to keep their skates sharp and ready for action.

CAG ONE Skate Sharpener

The CAG ONE skate sharpening machine is the state-of-the-art solution for skaters looking for precision and consistency. With its unique mechanism that applies constant pressure from heel to toe, this machine ensures that the profile of the blade remains exact every time.

Unlike other sharpening systems, the CAG ONE produces a flawless, mirror-like finish that exceeds industry standards. If you want the best skate sharpening experience available, the CAG ONE is the way to go.
